Global Roaming Distribution Announces Full Data on CelTrek International SIM Card

Miami – (BUSINESS WIRE) – Global Roaming Distribution (OTCBB: GRDB – News), is adding full data capabilities to its international SIM card CelTrek. The telecommunications holding company which specializes in providing extremely low-cost roaming solutions for corporate and leisure travelers around the globe plans to release its V3 CelTrek SIM card the end of June.

With economical full internet and voice services, CelTrek is the first international prepaid roaming product that combines these features with a real local US phone number. Business and leisure travelers can now move country to country without the worry of a large roaming wireless bill or spend time distributing international contact numbers.

“We have been meeting the market needs for extremely low-cost roaming fees, ease of calling with real local numbers and top quality customer care. We listened to our clients when they yearned for full data internet service too! And why shouldn’t they have it all?” says Global Roaming CEO, Florian Y. Seroussi. “The new CelTrek V3 now gives them the freedom and choice to have just what they need, at prices they want, on one device with just one SIM card.”

“With economical data and voice, plus your own local US number, CelTrek has redefined the term “full service” in the international roaming market place. CelTrek users can browse the Internet, read their emails on gmail (GOOG) or anywhere else they have an email account and chat on Microsoft Messenger (MSFT). Users can also connect to Facebook and other social media networks all from their phone. Global Roaming Distribution delivers the online world to travelers whether you are using the iPhone (AAPL), a Blackberry (RIMM) or any other type of unlocked mobile phone.” Seroussi continued.

The data platform for CelTrek will be full Packet, including GPRS/EDGE and UMTS/HSDPA, giving users the full spectrum of coverage to go with their mobile devices on virtually any of the 350 GSM networks CelTrek covers in more than 165 countries.

About [Global Roaming Distribution, Inc. \(GRDB.OB\)](#)

Global Roaming Distribution, Inc. is the parent company of CelTrek, an international global SIM card company.

CelTrek™ is the first US-based SIM product of its kind. Just one CelTrek SIM card covers 165 countries, all continents with a local US phone number at prices up to 90% lower than those of other major US carriers.

By forming strategic alliances on over 350 GSM systems, embracing the latest features in SIM technology and bundling that with a corporate management system, CelTrek is positioning itself to be the business roaming solution for corporations and leisure travelers around the world.
